EDUCATION

Savitribai Phule Pune University <i>Master of Computer Applications (MCA)</i>	2026 – 2028
MES Garware College (Autonomous) <i>Bachelor of Business Administration in Computer Applications (BBA-CA)</i>	2022 – 2025 GPA: 8.5/10.0

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, SQL
Frameworks: React.js, Node.js, Express.js, Bootstrap, Tailwind CSS
Database: MongoDB, MySQL
Version Control: Git, GitHub
Testing: Postman, Manual Testing, Unit Testing, API Testing, Vitest

EXPERIENCE

Full Stack Web Development Intern – Aaryavarta Technologies - Gained hands-on experience in HTML, CSS, JavaScript, React.js, Node.js, Express.js, SQL. - Developed and deployed full-stack web projects, implementing frontend interfaces, REST APIs, backend functionality, and database integration. - Worked on development tasks while gaining practical experience in debugging, testing, and application development workflows.	March – Aug 2026
Web Development Intern – Oasis Infobyte - Developed responsive web pages using HTML, CSS, and JavaScript. - Implemented interactive UI components and improved website usability and responsiveness. - Worked on web development tasks while following modern web development practices.	Oct – Dec 2025

PROJECTS

Roamella – Property Rental Platform <i>JavaScript, Node.js, Express.js, MongoDB, EJS, Cloudinary</i> - Developed a full-stack property rental platform with CRUD operations, browsing, and category-based filtering. - Built RESTful APIs for users, listings, and reviews using MVC architecture with MongoDB Atlas. - Implemented authentication and authorization with Passport.js, hashed passwords, sessions, and server-side validation. - Designed responsive UI with Bootstrap and integrated image uploads via Multer and Cloudinary. - Deployed on Render for live access with dynamic listing views and seamless user experience.	Live Demo GitHub
Tradix – Stock Trading Platform <i>React.js, Node.js, Express.js, MongoDB, Tailwind CSS, JWT</i> - Developed a full-stack stock trading platform with separate frontend, backend, and dashboard applications. - Implemented user authentication and authorization using JWT, bcrypt, and protected API routes. - Built trading functionality for buying and selling stocks with CNC and MIS order types. - Developed user-specific funds, holdings, orders, and positions with RESTful APIs and MongoDB. - Created responsive dashboard interfaces using React.js and Tailwind CSS with reusable components and route-based navigation.	Live Demo GitHub
Weather App <i>React.js, Material UI (MUI), REST API</i> - Developed a responsive weather application fetching real-time global weather data via REST APIs. - Displayed key metrics (temperature, humidity, wind speed, sunrise/sunset) with dynamic weather-based backgrounds. - Implemented robust API error handling with user-friendly error messages.	Live Demo GitHub
